

400 Series 404D-22TA

Compact Industrial and Construction Power

49.3 kW / 66.0 bhp @ 2800 rpm

The Perkins 400D range has been developed in consultation with our marketplace. This 2.2 litre, 4 cylinder, turbocharged, air charge cooled engine is a new product to the 400 Series product line-up. The 404D-22TA becomes the flagship model in the range offering an increase in the power available from this compact, lightweight range of engines whilst maintaining all the customer benefits they can experience from other products in the range.

The 400 Series engine family continues to set new standards in the compact engine market. Developed alongside customers to fulfil their needs in the construction, materials handling, agricultural/turf, genset and compressor markets, it is another class leading diesel range from Perkins.

Built to the most demanding standards, the 400D engines meet all the requirements of the off-highway emissions legislation for Stage IIIB, Tier 4 Interim and MLIT Step 4 (see 'Perkins Emissions Statement' on page 2). Long 500 hour service intervals, a two-year standard warranty, low noise and harshness, and a wide range of options make the 400 Series range the complete solution for compact power needs.

The 404D-22TA is a powerful but quiet 2.2 litre turbocharged unit delivering impressive performance with low operating costs in a small efficient package ideal for a range of off-highway applications.

Ultra-compact power

- The neatly installed side mounted turbocharger position provides additional power with minimum impact on package size making fitment into machines easier.

Clean and quiet

- Noise levels have been kept to a minimum.
- Subjective harshness has been carefully controlled making the engine sound even quieter.

Durable power

- Product design and process improvements enhance both engine reliability and durability.
- An improved governor and compliance testing delivers reliability of 6,000 hours.
- A standard 2-year warranty demonstrates our confidence in durability and reliability.

Low operating costs

- Approved for operation on biodiesel* concentrations of up to 20%.
- Oil and filter changes are 500 hours, dependent on load factor.
- Engine durability and reliability, the warranty offering, and ease of installation combine to drive down the cost of ownership.

Product support

- Through an experienced global network of distributors and dealers, fully trained engine experts deliver total service support around the clock, 365 days a year. They have a comprehensive suite of web based tools at their fingertips, covering technical information, parts identification and ordering systems, all dedicated to maximising the productivity of your engine.
- Perkins actively pursues product support excellence by insisting our distribution network invest in their territory to provide you with a consistent quality of support across the globe.
- Throughout the entire life of a Perkins engine, we provide access to genuine OE specification parts giving 100% reassurance that you receive the very best in terms of quality for lowest possible cost... wherever your Perkins powered machine is operating in the world.

Performance Data	Gross intermittent (ISO/TR 14396)	Speed (rev/min)
Power Output (kW)	49.3	2800
Power Output (bhp)	66.0	2800
Peak Torque (Nm)	208.4	1800
Peak Torque (lbf ft)	153.7	1800

Power output for a run-in engine after 60 hours.
*Subject to conformance with ASTM D6751 and EN14214.

400 Series - 404D-22TA

Compact Industrial
and Construction Power

49.3 kW / 66.0 bhp @ 2800 rpm

Engine specification

- Cast iron engine block
- Flywheel and flywheel housing
- Fuel injection pump
- Split element fuel filter
- Glow plug starting aid
- Lub oil sump
- Spin on lub oil filter
- Inlet manifold
- Cast iron exhaust manifold – side outlet
- Coolant pump belt driven
- Starter motor 12 volt
- Alternator 12 volt 65 amp
- ESOS (Electric shut-off solenoid)
- Lub oil pressure switch
- Coolant temperature switch
- SAE A PTO
- Choice of cooling fans
- High and low fan positions
- Electronic controlled governing as an option

Option groups

A selection of optional items is available to enable the customer to prepare a specification precisely matched to your needs.

Emissions statement

- Variable Speed: Industrial and IOPU engines: Certified against the requirements of EU Stage IIIA (Directives 97/68/EC, as last amended, and 2005/26/EC, as last amended); and US EPA Tier 4 Interim (40CFR Parts 1039. (NOTE Tier 4 Final will start in 2013 model year for 19-56 kW engines).
- Constant Speed Engines for use in Industrial, IOPU and ElectropaK applications: Certified against the requirements of EU Stage IIIA (Directives 97/68/EC, as last amended, for mobile applications); and US EPA Tier 4 Interim (40CFR Parts 60 for stationary applications and 40CFR Part 1039 for mobile applications).

Lower speed ratings may not be read from this curve.

Engine data

Number of cylinders	4 in-line
Bore and stroke	84 x 100 mm
Displacement	2.2 litres
Aspiration	Turbocharged
Cycle	4 stroke
Combustion system	Indirect injection
Compression ratio	23:3:1
Rotation	Anti-clockwise viewed on flywheel
Cooling system	Liquid
Total lubrication capacity	10.6 litres
Total coolant capacity	3.6 litres
Dimensions	
Length	660 mm
Width	531 mm
Height	725 mm
Dry weight	194 kg

Final weight and dimensions will depend on completed specification.
